

Round Pens

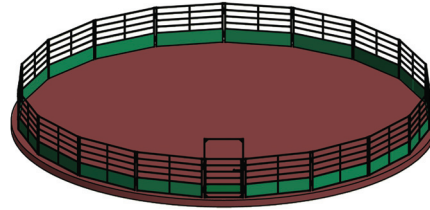

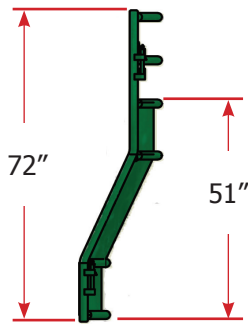

Rocky Mountain, Foothills, and Parkland

Item Numbers 2930, 2935, 2911, 2907, 2910, 2906

Rocky Mountain

The 6' high Rocky Mountain sheeted round pen is designed for the equine enthusiast who wants the best. To create a smooth and continuous 'round' ring each panel is curved. Additionally the sides are tapered for superior protection of both horse and rider. The 60' diameter Rocky Mountain round pen is simply without peer.

Foothills

The Foothills round pen is a cross between the Parkland round pen and the Rocky Mountain round pen.

The panel design is based primarily on the Parkland panel. Indeed the panels themselves are essentially the same and include all the same safety features described. Rather than using mud legs however these panels extend right to the ground and include a sheet metal skirt around the perimeter. The skirt will help keep the footing materials as well as the feet inside the ring.

Guide to Round Pen Sizes

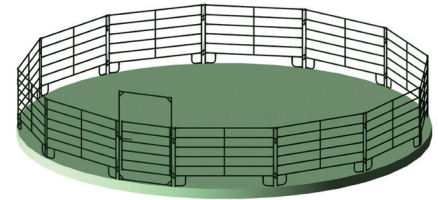

40' Diameter Round Pen
12 - 10' Panels & 1 - 6' Frame & Gate

50' Diameter Round Pen
15 - 10' Panels & 1 - 6' frame & Gate

60' Diameter Round Pen
18 - 10' Panels & 1 - 6' Frame & Gate

70' Diameter Round Pen
22 - 10' Panels & 1 - 6' frame & Gate

80' Diameter Round Pen
25 - 10' Panels & 1 - 6' Frame & Gate

Parkland

Designed specifically for the equine industry, Hi-Hog's round pen panels represent the perfect balance of portability and strength. Both the panels and gates are 6' high; the height recommended by professional trainers. Constructed with 60,000 psi high tensile 1.5" steel tubing for superior strength (all tubing is 16 ga. except for the gate frame which is 12 ga.).

1. Coned verticals protect horses from sharp edges.
2. Mud legs inhibit sinking.
3. Coped vertical stays provide superior strength with no sharp edges.
4. Come standard with our most popular plunger latch and striker plate.
5. Panels come with top rail extensions to eliminate the dangerous leg traps found on other round pen panels.
6. Gusseted frame for superior strength.
7. Universal connectors give you the freedom to combine any Hi-Hog panel style without the need for adaptors.

Rocky Mountain

Description	Item Number	Stock Non Stock	Weight (LBS)
Panel	2930	NS	211
Frame & Gate	2935	NS	255
